INTRODUCTION

Millions of years ago, a meteor survived the plunge through the Earth's atmosphere, impacting the then warm climate of Antarctica...

The first people to discover this land were a tribe of Polynesians. Despite the now freezing conditions, there was an abnormal abundance of life and the tribe settled, worshipping the meteorite crater for the powers it appeared to hold.

Generations later though, catastrophic events forced them to flee in terror...

Today, the same area is being excavated by the research company: RX Tech, who are picking up unusual readings from the meteorite's impact zone. It is in this zone that they uncover the body of a sailor from Charles Darwin's voyage on The Beagle. It seems a few of his sailors had explored the interior of the crater...

Following a story from one of the sailor's journal, RX Tech have started to take a particular interest in, not only the crater area, but other parts of the globe where the sailors traveled to...and died in...

One of these places is India - where Lara is currently searching for the legendary Infada artifact. Unaware of its true history, she only knows that in local beliefs it was supposed to hold great powers and has been revered by tribes there throughout the years...

Soon she will discover a lot more...

ACTIONS
Moving
Running/Sprinting
Pressing Up moves Lara forward at a running pace, pressing & holding R2 will make her temporarily sprint. A small energy bar will appear, when the bar depletes Lara will revert back to a run.
Pressing Down makes Lara jump back a short distance.
Pressing Left or Right turns Lara Left or Right.

Walking/Side Stepping
By pressing Walk (R1) Button in conjunction with the Up & Down Directional buttons, Lara can carefully walk forwards or backwards. By pressing Walk (R1) Button in conjunction with the Left & Right Directional buttons, Lara will Side Step. While the Walk (R1) Button is held down, Lara will not fall off any edge - if you walk up to an edge Lara will automatically stop.

Roll
Pressing Roll ○ Button will make Lara roll forward, and finish up facing the opposite direction. This also works when Lara is underwater.

Jumping
Lara can jump in any direction, to evade her enemies.
Press Jump ◆ Button and Lara will jump straight up into the air.
If you press a Directional button immediately after pressing Jump, Lara will jump in that direction. In addition, pressing Down or Roll straight after starting a forward jump makes Lara somersault in the air and land facing the opposite direction. This also works when jumping backwards by pressing Up or Roll immediately after takeoff.

NOTE: By jumping straight up while holding the × Button, Lara can “inch” her way forwards and grab those tricky ledges.
Swimming

Underwater
If Lara finds a deep pool of water, she can jump in, and swim around. Lara can hold her
breath for about one minute; if she is still underwater after that she'll drown. Some water
is very cold, Lara can only swim in this water for a short time. An Exposure Bar will
appear and begin to deplete when you enter this kind of water.
Pressing Up, Down, Left or Right makes Lara rotate in that direction.
Pressing Jump ○ Button makes Lara swim.
Lara can pull levers and pick up objects under water. Just position Lara as close as you
can and press Action × Button.

Swimming on the surface
Left and Right will rotate her, and Up and Down make her swim in those directions. You
can also use the side step actions to swim Left or Right when on the surface of the
water.
Pressing Jump ○ Button will make Lara dive under the surface again, while pressing
Action × Button when Lara is close to an edge will make her climb out.

Wading in shallow water
Lara won't swim in waist deep water; instead she wades. The controls are basically the
same as when she is on dry land, except it is slower going and she can only jump on the
spot, not in a direction.

Attacking
Lara starts the game carrying two pistols. Later in the game she may find some extra
weapons. Note that the pistols have unlimited ammunition.

Shooting

Press Draw Button and Lara will draw her guns. If she sees something she doesn't like the look of, she will point her guns at it. If there are multiple enemies, Lara will lock on to different targets, choosing the best one as she sees fit.

Pressing Action Button while Lara is aiming at something will assign that enemy as the current target. It will remain as the current target indefinitely while the Action button is held down, regardless of whether or not Lara loses her lock. While Action Button is held, Lara will only fire at the current target, ignoring any other enemy in the vicinity. If Lara loses sight of the enemy, it will break her lock, but that enemy will still be assigned as the current target.

The camera will track the current target, so even if Lara loses sight of it, you can still see where it is.

To make Lara continue shooting the current target after she has lost her lock, simply point her in the right direction.

If you want to shoot a different enemy, simply let go of Action Button, and Lara will pick a new target.

While you have your guns out, Lara can no longer do anything that would involve the use of her hands. These actions are described below.

Note: Lara can also shoot down certain doors in areas.

Other Actions

Vaulting

If Lara is faced with an obstacle that she can climb over, pressing Up and Action Button will make her vault onto it.

Climbing

Some walls are climbable. If Lara comes across such a surface, pressing Up and Action Button will make her jump up (if there is room) and catch handholds on the wall. She
will only hang on while Action is held down. She can then be made to climb up, down, left and right by pressing the Directional buttons. Pressing Jump * Button will make Lara jump backwards away from the wall.

When Lara arrives at the top of the ladder she may face with a small opening, pressing Crawl (L2) Button will make Lara duck and pressing Up on the Directional buttons will make Lara Crawl into the gap if she will fit.

Duck and Crawl
As described above Lara can Duck by pressing the Crawl (L2) button and Crawl by keeping that Button pressing while using the Directional buttons to move her as you wish. Lara can also pick up objects while crawling. Simply position her right in front of the object and press the Action X Button.

Grabbing hold
If Lara is near to a ledge while she is jumping, pressing and holding Action X Button will allow her to grab the ledge in front of her and hang there. If a wall is climbable, Lara can catch onto it anywhere (not just ledges).
Press Left or Right, and Lara will shimmey sideways.
Pressing Up will make Lara climb up to the level above.
Let go of Action and Lara will drop.

Monkey swing
If Lara discovers an overhead frame, she may decide to monkey Swing across it. To perform this press Jump * Button to Jump up to the frame, the Action X Button to grab on to the frame, and while still holding the Action X Button, press Up on the Directional buttons to swing forwards. Pressing Left & Right Directional buttons will make Lara hang and rotate. Releasing the Action X Button will cause Lara to release the bars.

Picking objects up
Lara can retrieve objects and store them in her inventory. Position Lara so that the object you want to retrieve is in front of her feet. Pressing Action X Button and she will pick it up. Often, enemies will drop objects when they are killed, it is always worth checking out their bodies just in case. Save Game Crystals are collected and added to your inventory by running through them.

Using switches
Position Lara so that the switch is in front of her. Press Action X Button and she will use it.

Using puzzle items/keys
Position Lara so that the object receptor is in front of her. Press Action X Button and the Inventory Ring will appear. Left and Right will allow you to select the object you want to try, and pressing Action again will use it.

Using Flares
If Lara finds herself in the dark and has any flares in her inventory, she can get one out and light it by pressing the Flare buttons (SELECT + R1). This will light up her surroundings for a minute or so, and while she is carrying it she can still vault or climb - they even work underwater. If she wishes to discard the flare, it can be dropped by pressing the Draw △ Button, to throw the Flare a longer distance press the Flare button combination again (SELECT + R1). Lara can slow light flares while crawling through tight spaces. Simply press the Draw △ Button to put Lara into a crouch, then select a flare.

Pushing/pulling objects
Lara can push certain blocks around and use them to climb up to greater heights.
Stand in front of the block and hold down Action X Button, Lara will get into her ready stance. Once she is ready, press Down to pull the block, and Up to push it, or if you decide you no longer wish to carry on with this task, simply release the Action button.
Looking around
Pressing Look (L1) will make the camera go directly behind Lara, whatever the camera is currently doing. With Look held down, the Directional buttons allow Lara to look around her. Once you let go of Look, the view returns to normal. (TIP: If you are trying to line Lara up for a jump, and the camera is in an awkward position, pressing just the Look button on it’s own will show you exactly what direction she is facing.)

IN GAME MENU RINGS
While in-game pressing the SELECT button will display the Menu Rings.
Press Left and Right to rotate the menu ring.
Press Action × Button to select the foremost item,
Press Up or Down to swap between Inventory, Items and Options rings (see Menu Ring for details of the options available).
